Tool sets for bicycles and e-bikes

Bike tools set with ratchet, bits, sockets and a bitholding screwdriver in the smallest of spaces. Perfect as a universal companion for a multitude of screwdriving applications. An added extra: The set comes with two bags - a larger pouch for the complete tool set and a small soft pouch to store the tools safely in your shirt pocket when you are on the go. The soft pouch has additional loops for holding CO₂ cartridges (the cartridges are not included).

With useful bike tools (chain riveter and chain fastener) to repair bike chains.

Premium bitholding screwdriver with Kraftform Plus handle for comfortable ergonomic screwdriving. Bit ratchet for quick working when screwdriving with a machine or conventional hand tool is not possible due to space constraints. Rapid reversing from clockwise to anti-clockwise rotation and vice versa via the reversing lever. The knurling on the ratchet head allows for quick rotation (with the thumb). Easiest operation, even with just one hand. Ergonomic ratchet head/lever: Kraftform geometry with perfectly shaped contact surfaces for the fingers. The direct bit mounting in the ratchet head provides small tool design for low working heights. Small return angle of 6° for precise working. Robust drop-forged solid steel design. Torques of over 65 Nm. The Rapidaptor bitholding screwdriver with fast-rotating sleeve: Can be used as an extension, for lightning-fast bit changes for even very small bit sizes with just one hand and without any extra tools.

Zyklop sockets with colour coding by size as well as size stamping - to help you find the required socket quickly and easily. Slip-proof thanks to the knurling at the rear end for easy handling even with oily hands. With ball stop groove. For external hexagon screws and bolts. Made of dull-chromed chrome-vanadium.

With the glass fibre reinforced plastic tyre levers, the tyres can be safely levered off the rim without damaging the rim. One tyre jack with valve ejector, one tyre jack with ¼" bit mounting.

The Bicycle Set 3 a

Chain tools

Rapid screwdriving

The Bicycle Set 3 a

The Bicycle Set 3 A is the practical assortment for independently carrying out assembly work and repairs on road bikes, mountain bikes and e-bikes. Particularly practical: one small case with zip to take individual tools with you in your jersey pocket. Less weight on bike tours.

With the included chain tool, chains can be loosened and reconnected; ideal for opening and closing bicycle chains. Suitable for single-speed chains up to 12-speed.

High working speeds can be attained with the Zyklop Mini bit ratchet. The thumb wheel is important, enabling more rapid screwdriving, and the lever of the Zyklop Mini only needs to be used for the final tightening of the screw.

Simple direction change

Simple switching between left/right operations.

The 9502 tyre lever with bit mounting

The 1/4" hexagon mounting in the 9502 tyre lever allows mounting of a 1/4" bit. In this way, light screw connections can be conducted.

The 9503 tyre lever

The 9503 tyre lever can be used as a valve ejector for Sclaverand (French) valves and as a bleeder valve for car valves.

Soft pouch

The textile pouch fits perfectly into jersey pockets and is, therefore, also ideal for racing cyclists without panniers or saddle bags. On the back, there are also two convenient loops for CO₂ cartridges.
